

## PsychSim 5: GET SMART

Name: \_\_\_\_\_ Section: \_\_\_\_\_

Date: \_\_\_\_\_

This activity will explore the concept of intelligence and some of the methods of measuring intelligence.

### **Intelligence and Adaptability**

- What does it mean to say that intelligence is a social construct?
  
  
  
  
  
  
  
  
  
  
- What do two children from dramatically different cultures (a boy working on an arrow and a girl working on a computer) have in common?

### **Verbal Versus Nonverbal Abilities**

- Describe one verbal and one performance subtest of the Wechsler Adult Intelligence Scale (WAIS).

### **Multiple Intelligences**

- Name and describe four of Gardner's eight "intelligences."
  
  
  
  
  
  
  
  
  
  
- Match Sternberg's three "intelligences" with their descriptors:
  - \_\_\_\_\_ Analytic                      A. Problem-solving in everyday tasks
  - \_\_\_\_\_ Practical                      B. Problem-solving in novel tasks
  - \_\_\_\_\_ Creative                      C. Problem-solving in structured, well-defined tasks

### **Emotional Intelligence**

- Define "emotional intelligence"
